

REMARKS

Applicant would like to thank Examiner Laekemariam for his helpful comments and suggestions during the telephone interview of July 20, 2009. The Examiner requested support from the original specification for the computer readable medium recited in claims 14 and 33. Applicant pointed out that claim 14 is original to the specification, it is understood that computer readable medium corresponds to a memory, and that it would be inherent to one of skill in the art that the mobile terminal (602) shown in Figure 6 includes a memory. The Examiner requested that the specification and drawings be amended to explicitly show a memory.

Accordingly, Figure 6 is amended to include a memory (615), and the specification is amended to recite that the processing unit (610) is connected to the memory (615). Support for this amendment to the specification and Figure 6 can be found at least from original claim 14. Therefore, applicant respectfully submits that no new matter is added.

Accordingly, applicant respectfully submits that the application is in condition for allowance, and such action is earnestly solicited. The undersigned hereby authorizes the Commissioner to charge Deposit Account No. 23-0442 for any fee deficiency required to submit this response.

Respectfully submitted,

Dated: 21 July 2009
